## DETAILED ACTION

### *Specification*

1. The preliminary amendment filed October 16, 2003 is objected to under 35 U.S.C. 132(a) because it introduces new matter into the disclosure. 35 U.S.C. 132(a) states that no amendment shall introduce new matter into the disclosure of the invention. The added material which is not supported by the original disclosure is as follows: the newly introduced subject matter in paragraphs 49 and 52 which describe wireless video communication. In paragraph 49 of the specification, as originally filed in parent application 08/189,405, applicant states "It is currently recognized that cellular transmission will ultimately provide dynamic motion and high resolutions freeze frame displays." Therefore, it is clear that **at the time of invention**, Applicant did not have possession of the claimed invention.

Applicant is required to cancel the new matter in the reply to this Office Action.

### *Claim Rejections - 35 USC § 112*

2. The following is a quotation of the first paragraph of 35 U.S.C. 112:

The specification shall contain a written description of the invention, and of the manner and process of making and using it, in such full, clear, concise, and exact terms as to enable any person skilled in the art to which it pertains, or with which it is most nearly connected, to make and use the same and shall set forth the best mode contemplated by the inventor of carrying out his invention.

3. Claims 17-67 are rejected under 35 U.S.C. 112, first paragraph, as failing to comply with the written description requirement. The claims contains subject matter which was not described in the specification in such a way as to reasonably convey to one skilled in the relevant art that the inventor, at the time the application was filed, had

possession of the claimed invention for the same reasons given in the last Office action and repeated below.

Independent claim 17 recites "wireless video communication structures" (lines 5, 24-25). However, the specification does not describe displaying video, graphic and text data at a wireless video communication structure in such a way as to reasonably convey that the inventor had possession of the claimed invention. In paragraph 49, the specification, as originally filed, describes using a cellular telephone for voice communication in the event of complications with the buyer's video terminal. Applicant then states "It is currently recognized that cellular transmission will ultimately provide dynamic motion and high resolutions freeze frame displays." Therefore, it is clear that **at the time of invention**, Applicant did not have possession of the claimed invention.

Claim 17 recites "electronically transmitting an indication of confirmation relating to the transaction initiated after an interface between the interfaced buyer and the traffic control system is terminated." However, the specification does not describe any confirmation.

### ***Response to Arguments***

4. Applicant's arguments filed July 23, 2007 have been fully considered but they are not persuasive.

Regarding the lack of support for wireless video communication structures, Applicant turns to U.S. Patent 4,825,457 as showing wireless video communication. However, Applicant cannot turn to another reference to show support for that which is

missing in Applicant's own disclosure. Moreover, this reference to another patent was not included in the originally filed specification.

Regarding the lack of support for "electronically transmitting an indication of confirmation relating to the transaction initiated after an interface between the interfaced buyer and the traffic control system is terminated," Applicant turns to Figure 9 as providing support. However, Figure 9 shows a Buyer Request Form which is initially blank and filled in by a buyer or vendor to indicate specific product information. There is no confirmation indication as recited in claim 17.

### ***Conclusion***

5. **THIS ACTION IS MADE FINAL.** Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

A shortened statutory period for reply to this final action is set to expire THREE MONTHS from the mailing date of this action. In the event a first reply is filed within TWO MONTHS of the mailing date of this final action and the advisory action is not mailed until after the end of the THREE-MONTH shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no event, however, will the statutory period for reply expire later than SIX MONTHS from the mailing date of this final action.
